

Project:
**Wheeler Sack Army Airfield
Mountain Ramp Expansion**

Location: Fort Drum, NY

Client:

US Army Corp of Engineers, New York

Contact:

Mr. Daniel Ward, USACE (315) 772-7562

Performance Dates:

May 2004 – October 2005

Construction Value:

\$10.7 million

Detailed Project Description

Subsequent to constructing the 9,000 linear foot taxiway, Tug Hill Construction crews expanded the existing airfield to facilitate quicker deployment of Fort Drum military troops.

As we did during taxiway construction, Tug Hill Construction utilized an on-site batch plant to manufacture roughly 40,000 cubic yards for the subsequent airfield project.

The project involved:

- ◆ Excavation
- ◆ Grading
- ◆ UXO Avoidance
- ◆ Utility Relocation
- ◆ Installation of Piping and Utilities
- ◆ Mass Concrete Paving

**Overall Performance
Evaluation Rating:**
ABOVE AVERAGE
